Data Definitions for the FTES/FTEF Report

Current Enrollment: This reports the live enrollment as of the generation of the report. This figure is changeable during the course of the term. After the census date, the current enrollment may not reflect the FTES-eligible enrollment (see below).

FTES Eligible: This reports the number of enrolled students that will be used to calculate State apportionment. Census figures for enrollment freeze as of the census date and are those submitted to the State in the form of the 320 Report, which generates apportionment of general funds. This figure may differ from current enrollment as a result of students dropping the course after the census date. At this time, this figure also includes non-resident students enrolled at census; non-resident students do not count toward apportionment, but they do pay non-resident tuition.

(Maximum Enrollment): This is a theoretical maximum number of students who could enroll in a course based on course caps in Curricunet, room restrictions based on seats/stations, or increased number of students added by instructor (but conforming to Fire Code restrictions).

FTES (Full-Time Equivalent Student): FTES is a standard statewide measure of student enrollment at an academic department, or an institution. The FTES/FTEF reports the actual full-time equivalent student apportionment generated by this course based on the eligibility defined above. One FTES represents a full-time student taking 15 credits each semester.

(@Max Enrollment): This predicts the FTES apportionment that would be generated by a course if maximum enrollment, as defined above, were achieved as of the census date.

(%Max FTES): This reports the current apportionment yield of a course, based on a comparison between the current FTES-eligible enrollment and the maximum enrollment, each as defined above.

FTEF (Full-Time Equivalent Faculty): A faculty member's actual workload is standardized against the teaching load to calculate FTEF. This is the number of full-time equivalent faculty currently assigned to teach the course. This figure is determined by the number and type of contact hours as established in the course outline of record. An FTEF of 1.0 corresponds to one faculty member teaching five, three-unit lecture courses each semester. Currently, this report may underestimate FTEF in cases where a FT faculty member is teaching a course (or some portion thereof) as an overload. Additionally, a course may appear to have a 0.0 FTEF as a result of being cross-listed/linked with another course.

FTES/FTEF: The classic efficiency calculation, wherein the generated apportionment per course is divided by the faculty load assignment, each as defined above. It is a measure of efficiency. It calculates the Full Time Equivalent Students by Academic Year and divides that number over Full-time Equivalent Faculty.

(Max FTES/FTEF): A predictive calculation of possible efficiency, wherein the maximum possible apportionment per course is divided by the faculty load assignment, each as defined above.

WSCH: the number of hours a course meets per week over the course of a 17.5 week semester. The State calculates weekly student contact hours based on the traditional 3-unit lecture model.
