- The success rate for Noncredit Adults with Disabilities remains about 11% above the campus average for the second consecutive academic year. This high rate can be attributed to the one-on-one instructional supports provided during class, the learning resources (technology, study materials) provided to our students, and the partnership with regional agencies that help us create positive learning opportunities for our students.

G. Review the **Disaggregated Student Success** charts; include any charts that you will reference. Describe any departmental or pedagogical outcomes that have occurred as a result of programmatic discussion regarding the data presented.

The following are some questions you might want to consider:

- What specific groups are experiencing inequities? What patterns do you notice in the data? How have the equity gaps changed since the previous academic year?
- What professional opportunities are your program faculty participating in to address closing equity gaps?
- What strategies, policies and/or practices in your program have you implemented or what could be improved to better support students who experience equity gaps?

- All students enrolled in the Adults with Disabilities Program are academically disadvantaged. The Continuing Education Department staff and AWD faculty collaborate to implement strategies to support student success. Supportive services are very intentional for this population. Faculty and staff collaborate with community partners to identify students' needs and develop plans to address learning gaps. The Continuing Education has developed student engagement activities and success workshops to support the success of our AWD students.
