Introduction

The 2018 Institutional Effectiveness Outcomes Report utilizes the performance metrics of the Student Success Scorecard. The information highlights key performance indicators identified by the California Community Colleges Chancellor’s Office. The purpose of the IEO Report is twofold—to provide the district and College Board Officials with a focused look at current performance—and a self-reflecting comparison to the college’s past performance.

The following Institutional Effectiveness Outcomes Report details this longitudinal self-focus and gives as a reference point the methodology of each metric. Recognizing that the processes of advancing Institutional Effectiveness far exceed the parameters of the macro view provided here, the IEO Report leads solely with the intention of expanding the collaborative district-wide dialogue on student and Institutional performance.

The metrics informing the first six and the ninth measures of Cuesta College’s Institutional Effectiveness Outcomes have been in effect since the inception of the Student Success Scorecard, so too have the metrics for measuring Cuesta College’s Institutional Effectiveness Outcome 13, an inclusive and supportive campus climate. The Campus Climate survey was specifically designed to get at the heart of students’ perceptions and experiences of diversity and inclusiveness at Cuesta College. The survey was last administered in 2016, in the classroom environment, to a random selection of students who were also completing the Community College Survey of Student Engagement (CCSSE); this survey will be repeated spring 2019 in conjunction with the next CCSSE administration. In addition, students enrolled in upper level English as a second Language courses, as well as those enrolled in Distance Education, were invited to complete the 2016 Cuesta College Campus Climate survey. Institutional Effectiveness Outcomes 7, 8, 10 and 11 are relatively new performance metrics. Transfer level English and Math completion in a student’s first or second year, career development and college preparation, and career skill building join the scorecard measurements and Cuesta College’s Institutional Effectiveness Outcomes list.

CAREER SKILLS BUILDER STUDENTS
Skills-builders are workers who are maintaining and adding to skill-sets required for ongoing employment and career advancement. Skills-builders successfully complete a limited number of courses, but do not earn a certificate or degree, or transfer to a four-year college.

Definition:
The median inflation adjusted wages before and after the year of enrollment for students who completed a SAM A, B, or C course of at least (.5 units) and passed all CTE coursework in a given academic year. These students were no longer enrolled anywhere in the system the following academic year and did not earn an award or transfer to a four-year college the year of enrollment or the following year.

Cohort (Students who showed course behavior related to career skills upgrading or industry license/certificate):
• SX 03 ENROLLMENT-COMPLETED -UNITS >= .5 units during a given academic year where at least some units completed had a SAM code of A, B or C.
• SB01 STUDENT IDENTIFIER STATUS = S (only students with valid SSN)
• Student must not be enrolled anywhere in the system the following academic year and did not earn an award or transfer to a four-year college the year of enrollment or the following year.
• Did not fail any CTE coursework in the year of enrollment (Grade F, NP, INP, FW).

Outcomes:
• Annual inflation adjusted median percentage change in earnings (1 year before to 1 year after) for all students in the cohort.
*Not all career skills building students with earning wages will be found in the EDDUI wage data. EDDUI data contain wages only for those employed in an occupation covered by Unemployment Insurance in California. This excludes individuals employed by the military or federal government, and those self-employed, employed out of state, unemployed, or not in the workforce after enrollment. The EDDUI data do not indicate the occupation in which an individual was employed, how many hours an individual worked, or part time/full time status. The EDDUI wage files are matched with Social Security Number (SSN). Therefore, students without a valid SSN were not included in the career skills builder metric.
