Integrated Planning Training
What is Integrated Planning?

• Developing Planning processes as well as a commitment to implement planning processes that are linked to one another as described in the ACCJC standards.

• Part of the infrastructure that supports continuous quality improvement, planning processes themselves need to be assessed.

• As a result of this assessment, planning processes are revised.
FIGURE 1: The San Luis Obispo County Community College District Model of Integrated Planning depicts how the components in district planning processes connect to the mission and link to one another in a cycle of evaluation, development of challenges, goals and objectives, resource allocation, plan implementation, and re-evaluation.
Institutional Goals & Objectives
SLOCCCD Integrated Planning?

- The San Luis Obispo County Community College District model of integrated planning depicts how the components in district planning processes link to one another in a cycle of evaluation, development of goals and objectives, resource allocation, plan implementation, and reevaluation.

- It is through the regular sequence of these planning practices that the district assesses institutional effectiveness and uses those assessments to continually improve the district’s services to students.
SLOCCCD Integrated Planning?

• Research is central to the San Luis Obispo County Community College District model of integrated planning because plans are developed based on data, and plan outcomes are assessed using quantitative and qualitative data.

• With this grounding in research, the components of the district’s model of integrated planning are as follows.
• **Mission** – describes the intended student population and the programs and educational services that the district provides to the community. As such, this statement is the foundation for all planning processes.
SLOCCCD Integrated Planning?

• Data analysis – includes the use of:
  – District data to assess its current effectiveness in meeting the San Luis Obispo County Community College District mission.
  – Community demographic data to foresee challenges and opportunities.
Long-Term Planning – current and anticipated challenges are identified based on data analysis.

These challenges are foundational for the development of the Educational Master Plan and the Facilities Master Plan.

Through the process of developing the Educational Master Plan, the district develops Institutional Goals that are intended to focus the district for advancing the mission and meeting the identified current and anticipated challenges.
SLOCCCD Integrated Planning?

- **Strategic Plan** – Institutional Goals are used to develop Institutional Objectives that describe specific initiatives that will be undertaken to achieve the Institutional Goals.

- The Strategic Plan informs two other types of short-term plans, the **Institutional Program Planning and Review** and the **Operational Plans**.
SLOCCCD Integrated Planning?

- **Resource Allocations** – are determined at three levels:
  - unit
  - cluster
  - institution

- These allocations are based on the priorities established in the Strategic Plan, the Institutional Program Planning and Review, and the Operational Plans.
SLOCCCD Integrated Planning?

- **Implement the Plans** – following resource allocation, the district works on completing:
  - the action steps identified in the Strategic Plan
  - the initiatives in the Operational plans and
  - the program objectives as identified in the Institutional Program Planning and Review.
SLOCCCD Integrated Planning?

- Annual data analysis – includes two types of assessment:
  1. **Assessments of program effectiveness** – measures each unit’s effectiveness in comparison to historical data as well as in comparison to the Institutional Goals and Institutional Effectiveness Outcomes.

  - This data analysis is the foundation for the Institutional Program Planning and Review process.
• **Annual data analysis** – includes two types of assessment:

2. **Assessments of plan effectiveness** – measures the district’s progress in achieving Institutional Goals and Institutional Objectives.

   - This data analysis is documented in an annual San Luis Obispo County Community College District progress report that informs the internal and external community about progress toward long-term goals.
SLOCCCD Integrated Planning?

- The processes that comprise this model of integrated planning are assessed every other year.
- This assessment is the basis for improvements to the planning processes.
What we need to do!

Implement and follow the plans!
