

ALEKS 6-Week Codes

Would you like to prepare before taking the mathematics assessment test?

Feeling a little nervous about your upcoming mathematics course?

Were you unsuccessful in your mathematics course and need to repeat?

The Cuesta College Mathematics Division is pleased to announce that ALEKS 6-week Course codes are now available through Student Equity Funding. The ALEKS software is a wonderful way to brush up on your prerequisite skills needed to be successful in your upcoming mathematics course.

Here's how it works: Come to the Math Division Office or a counselor and sign up to get your code for the course you are interested in. This is a six week code. However, you can finish it early. Please be sure to take yourself through the ENTIRE course BEFORE you take the assessment or repeat a course. Below is a list of ALEKS courses and how they relate to Cuesta College Mathematics courses.
