CAREER OF THE MONTH

Dietitian

Dietitians/Nutritionists plan diets to help people maintain or recover good health. In addition, they may manage personnel, oversee food purchases and supervise preparation of food.

American Dietetic Association registration (RDA) is desired by most employers and requires a Bachelor of Science degree in Nutrition, Dietetics or closely related field plus an internship in dietetics. Preparation is available at several California State Universities. Nationally, the demand for dietitians is growing and is expected to continue to do so.
