

Microsoft Remote Desktop Installation Help for Mac users

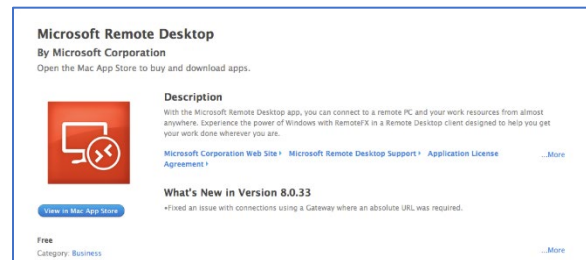

Microsoft Remote Desktop for Mac users will allow Cuesta College employees remote access to certain systems (e.g. ARGOS, Banner INB, SARS Anywhere, network drives, etc.).

NOTE: We recommend updating your operating system to macOS Catalina in order to install the Microsoft Remote Desktop App.

1. Go to <https://itunes.apple.com/us/app/microsoft-remote-desktop/id715768417?mt=12#>.

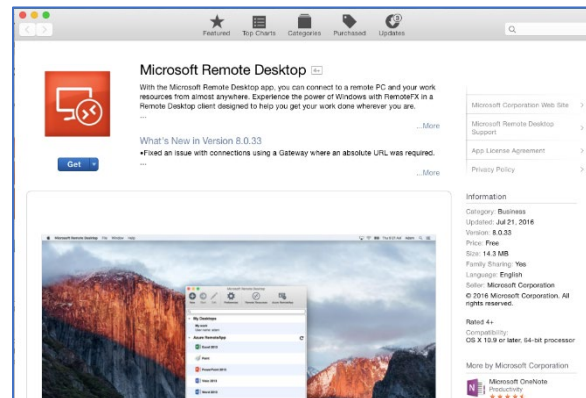

iTunes will open, displaying Microsoft Remote Desktop information screen.

2. Click the **View in Mac App Store** icon.

The Microsoft Remote Desktop download screen will display.

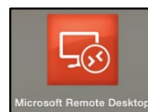

3. Click the **Get** icon.
- The Get icon will change to the "Install App" icon.*
4. Click the **Install App** icon.
- RemoteApp will be installed.*

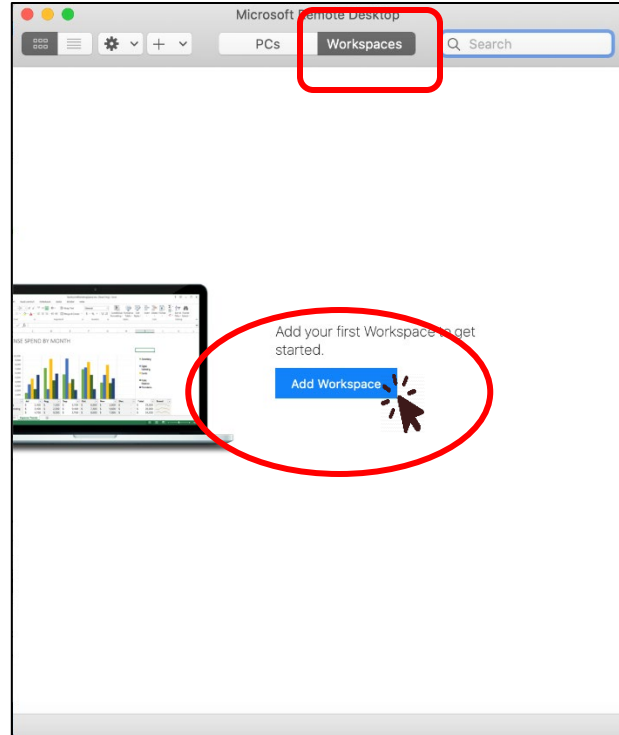

5. Click **Launchpad**.

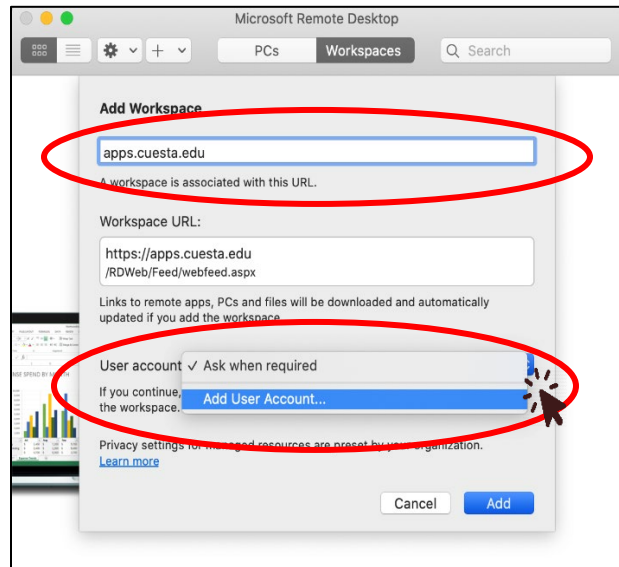

6. Click the **Microsoft Remote Desktop** icon.
- The application window will open.*

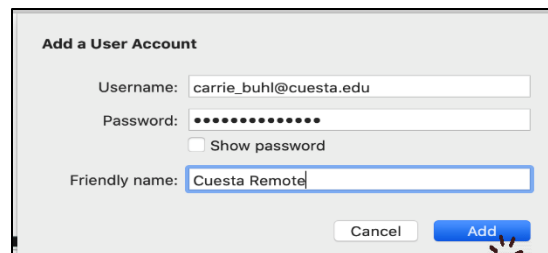

7. Click on the **Workspaces** button, then click on the blue **Add a Workspace** button.

8. In the new Add Workspace window, type **apps.cuesta.edu**. Then select **Add User Account...** next to **User account**

9. Enter your **Cuesta email** address, **password**, and give it a **Friendly Name of your choice** then click **Add**.

10. **Click Add.** Your Remote App will be ready. Refer to the [RemoteApp](#) resource for more direction on how to use your workspace.
