

There are different types of Work Experience Classes:

The course that you should be enrolled in is based on both your major/career goal and the nature of your job.

- **General WEXP (251):** You should be enrolled in this type of WEXP course if your current position is not directly related to your area of study or career goal. However, you will still demonstrate that your position directly benefits your future career goals.
- **Occupational WEXP (252):** You should be enrolled in this type of WEXP course if your position is DIRECTLY RELATED to your area of study or career goal. For example: You would select this option if you are working for an Accounting firm and your major is Accounting.
- **Discipline-Specific Occupational WEXP (e.g. ATCH 252, BUS 253, CUL 252, KINE 252, NUTR 252):** You should be enrolled in this type of WEXP if your job and your major/career are in one of these disciplines. You can arrange with your department or communicate with Career Connections about this option.
